Directions:

Print the die pattern on page 2 on card stock. Cut out the 12 sided die pattern. Fold in all tabs, and fold where two pentagons meet. Glue the tabs inside to create a 12 sided die.

Print a game mat for each player on regular paper. Make sure each player has crayons or markers in the following colors (or you can use one set for the table): Red, orange, yellow, green, blue and purple.

Players take turns rolling the die and coloring in the correct part of the rainbow. If they roll a color they've already done, they lose their turn. Players must color the rainbow in the correct order! First player with a finished rainbow wins!

Roll A Rainbow!

Directions

Roll the 12 sided rainbow die.

Color your rainbow with the color you roll.

If you roll a color you've already filled in, you skip your turn.

Make sure you color in the right order!

The first player to finish their rainbow wins!
